**TRC Synergy Bhd announced that it has proposed a corporate exercise consisting of a 1-to-2 share split, 1-for-5 bonus issue and a free warrants issue on a 1-for-5 basis, which will be completed in the said sequence.**

The group is undertaking a 1-to-2 share split, splitting its par value from RM1.00/share to RM0.50. After the share split, the group will subsequently reward shareholders with one bonus share for every five shares held. Finally, eligible shareholders are entitled to one free warrant for every five share owned.

The warrants would have a tenure of five years and the strike priced has been fixed at RM0.61; a 10% discount on the theoretical closing price of the shares of RM0.68 on 11 May 2011.

#### Our view

In our results preview report dated 29 April 2011, we have speculated that the company would undertake some sort of capital management exercise to reward its shareholders on the basis that it has a huge reserves. Hence, this has been done via a 5sen dividend declaration and also these corporate exercises. In our opinion, perhaps the more important side effect of these exercises would be the positive vibes and signals it sends out to shareholders and also to the market as the company is financially able to undertake such an exercise.

In addition to that, this exercise would definitely enhance its liquidity and would make the stock more attractive and more easily traded on the stock exchange. This would inadvertently attract more institutional funds as the issue with liquidity would be greatly reduced and also participation from the retail market as these exercises would increase the affordability of owning the stock.

#### Impact

Assuming a maximum case whereby the ESOS, ICULS, and the existing warrants are completely exercised before the proposed share split, the group's shareholders fund would increase from RM298mn to RM347mn. Gearing remains unchanged at close to zero times. The enlarged share capital would then be 686.2mn from 190.8mn currently.

Given the proposed issuance of new warrants, FY11 EPS will be diluted by 26%. We arrive at a theoretical ex-TP of RM0.76/share after adjusting for the 1-to-2 share split, the 1-for-5 bonus issue first and the dilution effects.

#### Valuation

Based on the theoretical ex-TP of RM0.76/share, we downgrade our recommendation to Hold from buy previously. The group's current orderbook stands at RM1.2bn with a tenderbook of around RM2bn.

**TP: RM2.08(+28.4%)**

**Theoretical Ex-TP: RM0.76**

**Last traded: RM1.62**

**HOLD**
